

RAHUL PRAKASH PAGAR

Data Analyst

Dublin | +353-894195898 | rahulpagar423@gmail.com | <https://www.linkedin.com/in/rahul-pagar1993/> | <https://github.com/RahulprakashPagar>

PROFESSIONAL SUMMARY

Data analyst with 5+ years of experience delivering analytics, business intelligence and predictive solutions across enterprise operation, performance management and strategic data driven decision making. Holds a master's degree in Business analytics with strong expertise in SQL, Python, Power BI & machine learning. Proven ability to transform complex datasets into actionable insights, executive dashboards and data driven support systems. Experienced in collaborating with stakeholders and applying ML and statistical modelling to solve real world business problems.

SKILLS

Analytics & Machine Learning: Statistical Analysis, Hypothesis Testing, Predictive Modeling, Classification, Regression, Descriptive Analytics, Feature Engineering, Model Evaluation

Programming & Data: Python (Pandas, NumPy, Scikit-learn), SQL, EDA, ETL Pipelines, Data Modeling, Data Transformation, Data Pipelines

Databases and Platforms: MS SQL server, MySQL, Mongo DB

Business Intelligence visualization: Power BI, Tableau, Interactive dashboards, Data storytelling

Soft skills: Team collaboration, Quick learner, Analytical thinking, Problem solving

Tools: Power BI, Tableau, MS Excel, MS PowerPoint, Jupyter notebook, Google Colab

WORK EXPERIENCE

Sr. Data Analyst

11/2022 to 08/2024

Skoda Auto Volkswagen India Pvt Ltd. Pune India

- Led an end-to-end analytics project, transforming large and complex data set into interactive Power BI dashboards that improved leadership visibility into performance metrics.
- Designed and developed KPI driven dashboards to track output trends, cost drivers' efficiency ratios, downtime impact and resource utilization enabling data driven decisions and contributing to a 15% improvement in overall performance.
- Built predictive and descriptive analytics models in python to forecast demand for products, usage trends improving planning accuracy by 18%.
- Applied machine learning techniques and built a model to analyze and predict the consumption and usage patterns by identifying anomalies and optimization opportunities that resulted in 7% cost saving.
- Performed trend analysis and root cause analysis on large production datasets to detect recurring performance issues, contributing to a reduction in disruption related losses.
- Automated analytics pipelines and reporting processes cutting manual analysis efforts and increasing analytics delivery speed.
- Performed predictive trend analysis on historical datasets to identify recurring performance issues and patterns enabling proactive decision making and supporting data driven optimization initiatives.
- Used SQL to extract, clean, and combine data from multiple sources, ensuring consistency and reliability across reports and dashboards.

Data Analyst

10/2021 to 11/2022

Caterpillar India Pvt Ltd. C. Sambhaji Nagar India

- Delivered targeted analytics use cases by analyzing performance, quality and event level datasets. Identifying inefficiencies that contributed to 12% cost reduction by through data backed optimization.
- Built Power BI dashboards tracking throughput, defect rates, downtime impact and utilization metrics enabling leadership to monitor trends in real time and improve decision making.
- Performed trend, variance and root cause analysis on historical performance and quality data of product uncovering recurring failures patterns that led to a 15% reduction in repeated issues.
- Developed predictive statistical models in python to estimate failure probability, defect frequency, and risk prioritization using historical incident logs and product quality datasets.
- Built and evaluated supervised machine learning models for demand forecasting, usage prediction, and anomaly detection, improving early issue detection accuracy by 24%.

Operation Analyst

10/2019 to 10/2021

Mahindra and Mahindra Ltd Nashik India

- Collected, cleaned, and prepared large volumes of test and sensor data using Python and SQL to ensure the analysis was accurate and reliable.
- Worked closely with cross-functional teams to understand requirements and translate business problems into analytical solutions.

- Applied descriptive and diagnostic analytics to understand performance variations and explain deviations from expected outcomes.
- Monitored key performance indicators (KPIs) and built dashboards related to productivity, cycle time, quality, and efficiency, and highlighted trends and deviations.

PROJECTS

- **ML Based EV Charging Load Prediction:** Designed and evaluated ML models to forecast station level monthly peak load in EV charging networks using temporal and weather data. Finding provide actionable insights for grid operators by improving demand planning, capacity management and reserve allocation strategies.
- **SMS Spam detection using NLP and Machine learning:** Implemented a text mining-based SMS spam detection model using SVC and XGBoost, delivering high precision and reliable spam filtering.
- **Heart Attack Risk Prediction Using Machine Learning:** Developed and evaluated machine learning models in Python to predict heart attack risk and improve early risk identification.
- **Predictive modelling for house price estimation:** Implemented machine learning models in Python for house price prediction, evaluating performance across multiple algorithms to deliver accurate and scalable predictions.
- **Telecom customer complaints trend and resolution analysis:** Used python to analyze customer complaints, uncovering trends, resolution performance and high risk regions to support data driven service improvement insights.
- **Cybersecurity Threat Monitoring & Risk Assessment Dashboard (Power BI):** Developed a business intelligence dashboard to analyze cyber security incidents, vulnerabilities and losses improving visibility and decision making for CISOs.

EDUCATION

MSc in Business Analytics

Sep 2024 to Sep 2025

Dublin Business School Dublin Ireland

Developing advanced business and data analytics skills to transform data into actionable insights, optimize decision making, and solve complex real-world problems for organizations and society.

Modules: Applied statistics & Machine Learning, Data Mining, Project Management, Financial Analytics, Business intelligence & data visualization using Power BI & Tableau, Introductory programming (python & SQL), Requirement analysis, Business strategy

Research paper (Dissertation): Machine learning based prediction of peak load in EV charging station.

Bachelor of Engineering

K.K.W.I.E.E. R Pune University Nashik India

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) – Certified Data Science Professional
- Google Advanced Data Analytics professional – Coursera
- Python for Data Science- IBM
- Machine Learning for Data Science – Simplilearn
- Data Visualization Using Tableau – Simplilearn
- Post Graduate Program in Data Science – Purdue University
